

MTM-1400

High-quality, low-maintenance treadmill

MTM-1400

THE NEW SCHILLER TREADMILL MTM-1400

STABLE AND LOW-MAINTENANCE

The MTM-1400 treadmill is virtually indestructible with its sturdy frame. It is very low maintenance and provides the runner or patient a comfortable run with its advanced construction. The MTM-1400 is distinguished by its smooth running, various functions, strong drive engine and the timeless design.

INTERFACE

The interface of the SCHILLER MTM-1400 treadmill ergometer allows connection to ECG, ergospirometry systems, blood pressure measuring devices and software programs via the coscom® protocol.

CHILDREN HANDRAILS FOR PAEDIATRIC REHABILITATION

Children handrails are available as an additional option (only in combination with the safety arch). The MTM-1400 treadmill can be used for paediatric rehabilitation with this option. Children can hold onto the handrail both on the sides and in front while walking on the treadmill, and therefore always have a sense of security and control.

NUMEROUS ADDITIONAL OPTIONS

You can customise the MTM-1400 treadmill to your field of application - whether rehabilitation, cardiopulmonary diagnostics for patients or fitness - with the numerous additional options.
